

Hermen Luchtenbelt

Researcher — Climate Risk & Adaptation

Climate & land-use researcher working on food systems, planetary boundaries and compounding climate risks.

📍 Utrecht, The Netherlands

☎ +31 6 83 65 86 34

WORKING EXPERIENCE

Researcher, Climate Risk & Adaptation · Wageningen University & Research 2026 – present
Wageningen, the Netherlands

- Research on compounding and cascading climate risks and their impacts on agriculture and society.

Researcher · PBL Netherlands Environmental Assessment Agency 2022 – 2026
The Hague, the Netherlands

- Scenario studies and quantitative analysis of AFOLU, with a focus on food systems, planetary boundaries and emissions.
- Contributed to the development and application of the IMAGE integrated assessment model.
- Authored a study on crop-yield impacts on food security and mitigation, a paper (under review) on regional planetary boundaries in food-system transitions, and several co-authored studies.

Research consultant · Global Green Growth Institute 2021 – 2023
Seoul, South Korea (home-based)

- Developed a system-dynamics simulation tool to explore environmental and economic impacts of policy scenarios and NDCs.
- Responsible for indicators related to AFOLU and greenhouse-gas emissions.

Student consultant, sustainable grazing · Wageningen University & Research 2018
Wageningen, the Netherlands

- Developed a business model for a GIS-based grazing system, including stakeholder interviews and a cost-benefit analysis.

Intern · Osotua Foundation & NCDO 2017
Nkoilale, Kenya

- Reported on interactions between cattle, culture and wildlife for a sustainability showcase of the Masai Mara region.

EDUCATION

MSc Climate Studies · Wageningen University 2020
Specialisation: Biogeochemical Cycles & Climate Change Mitigation

- Thesis: assessing climate risks for assets and investments of the brewing industry using the WOFOST crop-simulation model [8.5/10].

MSc Environmental Economics · Wageningen University 2020
Specialisation: Environmental Economics & Natural Resource Management

- Thesis: econometric estimation of elasticities of substitution between ecosystem services and other inputs in agricultural production [9.0/10].

BSc Economics & Governance · Wageningen University 2017
Major: Agricultural Economics · Minor: Geo-information Science for Environment & Society

Erasmus+ exchange · Czech University of Life Sciences (ČZU), Prague 2016
Minor: Environmental Economics

SKILLS & LANGUAGES

Programming	Python, Fortran, R	Dutch	Native proficiency
Modelling	Stata, MATLAB, GAMS	English	Full professional proficiency
GIS	ArcGIS, QGIS (basic)	Spanish	Limited working proficiency
